

# Terms of Use

## 1. About CirclesAI

CirclesAI is a service that automatically generates responses and images based on information you enter. We may extend CirclesAI to provide (a) information on services or promotions suited to you; (b) support for your enquiries based on your plan and your use of our services; and (c) other features that make CirclesAI more useful to you. These features are not necessarily available today. If we introduce them, we will tell you what they do, what information they use and any applicable conditions, in the app, on our website or by other appropriate means, and will obtain your consent where required by law.

## 2. Third-party AI providers

CirclesAI uses AI models and services provided by third parties, including OpenAI, Perplexity, Alibaba Cloud (Qwen), Google (Gemini) and Anthropic, and other providers we may add from time to time. You may choose which model to use where this option is offered. By using CirclesAI, you agree that the terms of use of the relevant provider apply to your use of its model, and you agree to comply with them.

## 3. Fair Usage Policy

Your use of CirclesAI is subject to a monthly usage limit, which keeps the service fast and affordable for all CirclesLife customers. The limit applies per calendar month and resets on the 1st of each month at 00:00 Singapore time. All CirclesAI features, including image generation and deep research, count towards the same limit. If you reach the limit, CirclesAI will be paused for you until the limit resets. Unused usage does not carry over. We may change the limit from time to time.

## 4. Your input

You represent and warrant that you have all rights, licences and permissions needed for anything you enter. You must not enter personal data of others, trade secrets or other confidential information, information you are bound to keep confidential, or any other information that is inappropriate under law or contract.

## 5. Use of outputs

When using outputs, you agree to respect human dignity and individual autonomy, comply with applicable laws, and not infringe the rights of others. You are fully responsible for any sharing of outputs, including posting on social media, disclosure, copying or sending to others, and for anything third parties do with them.

## 6. Prohibited conduct

You must not use CirclesAI to: infringe copyright, trademarks, image rights or other third-party rights; impersonate anyone; create images or other content using personal data, trade secrets or other confidential information; break or encourage breaking the law; act against public order or morality; create or use discriminatory, violent, sexual or otherwise inappropriate content; cause harm to us or others; bypass or attempt to bypass safety measures, filters or usage limits (including the Fair Usage Policy, for example through automated or bulk use); or do anything else we reasonably consider inappropriate.

## 7. Content safeguards

CirclesAI is configured to prevent the generation of content that may break the law, offend public order or morality, or infringe the rights of others. As a result, some requests may not produce an output. We do not guarantee any output, or the absence of one.

## 8. Performance and variability

CirclesAI depends on the speed and performance of the third-party AI systems it uses. By their nature, outputs may vary depending on how those systems have been trained and on prior interactions.

## 9. No warranty

Outputs are generated automatically by AI and may not be accurate. You are responsible for assessing whether an output is accurate and appropriate. We make no warranty about the completeness, accuracy, safety, legality, fitness for purpose or usefulness of CirclesAI or its outputs, or that outputs do not infringe third-party rights.

## 10. Intellectual property in outputs

We make no warranty about ownership of, or your right to use, copyright or other intellectual property in outputs. You decide at your own risk whether to use an output.

## 11. No training on your data

We do not use information you enter to train AI models.

## 12. Changes

We may change CirclesAI, or suspend or end all or part of it, without prior notice.

## 13. Other terms

These terms apply in addition to the Circles.Life Terms and Conditions and Privacy Policy.
